

# BIODIVERSITY POLICY

At Momentive, we are committed to preserving and enhancing biodiversity as an integral part of our sustainability strategy. We recognize the vital role biodiversity plays in maintaining the health of ecosystems, supporting resilient economies, and promoting the well-being of communities. Our biodiversity policy is aligned with the European Union Deforestation Regulation (EUDR) and the United Nations Sustainable Development Goal 15 (SDG 15), which aims to protect, restore, and promote the sustainable use of terrestrial ecosystems.

## Purpose and Objectives

Through this policy, Momentive aims to set in motion changes across our operations that promote biodiversity-positive outcomes. Our objectives include:

Sourcing raw materials from suppliers that are aligned with recognized sustainability standards, such as the Roundtable on Sustainable Palm Oil (RSPO), and that aim to eliminate deforestation in their operations.

Striving for traceability across our supply chains to confirm that materials do not contribute to deforestation or forest degradation.

Monitoring and assessing the biodiversity impacts of our operations and using data to inform continuous improvement in our sustainability practices.

Incorporating biodiversity considerations in decision-making and taking proactive steps to safeguard ecosystems in and around our operations.

Collaborating with partners across our value chain to support products and practices that reduce pressure on forests from land-use change.

Supporting ecosystem restoration initiatives that regenerate degraded ecosystems and enhance biodiversity resilience.

## Implementation and Oversight

By implementing this policy, Momentive aims to create a positive sustainability impact. It serves as a foundation for integrating biodiversity principles into our culture and operations. The policy will be reviewed and updated at least annually. Execution of its provisions will be led by relevant functions across the business, with oversight from the Corporate Sustainability organization.

## Conclusion

Momentive is committed to integrating biodiversity conservation into our operations, from sourcing to supply chain management. This policy aims to reduce our environmental impact, protect ecosystems, and support global sustainable development. By adhering to the EU Deforestation Regulation and contributing to UN SDG 15, we focus on halting deforestation, safeguarding ecosystems, and promoting sustainable land-use practices. Together with our partners, we aim to create a lasting, positive impact on the planet's biodiversity.
